

Muhammad Tayyab Mushtaq

Senior Software Consultant (.NET | Angular | Azure | SQL)

Summary

Senior Software Consultant with 6+ years of experience delivering scalable .NET and Azure-based solutions in remote, Agile environments. Specialized in building RESTful APIs, modernizing legacy systems, and improving performance through cloud architecture. Experienced in collaborating across distributed teams, leading code reviews, and mentoring developers to uphold engineering best practices. Proven success in reducing deployment risks, enhancing system efficiency, and delivering measurable impact across enterprise applications.

Technical Skills

Programming Languages: C#, JavaScript, TypeScript, SQL

Frameworks & Technologies: ASP.NET Core, .NET (Web API, MVC, Razor, Web Forms), GraphQL, Node.js, Nest.js, Angular , HTML, CSS

Cloud & DevOps: Azure DevOps, CI/CD Pipelines, Docker, Kubernetes, SonarQube, Datadog

Databases: SQL Server, PostgreSQL, Azure Cosmos DB, MongoDB

Testing & Tools: xUnit, Git/GitHub, Azure Repos, Pentaho, SSRS, Windows Services

Professional Experience

10Pearls — Senior Software Consultant

Remote | Jun 2022 – Present

Project: Enterprise Leasing Platform (Azure, .NET Core, Typescript, Kubernetes, DevOps)

- Collaborated directly with client stakeholders to analyze technical issues and propose reliable, scalable solutions.
- Refactored core business logic to improve maintainability and ensure accurate decision outcomes.
- Integrated Datadog for centralized logging and observability, improving system reliability.
- Enhanced deployment pipelines via Azure DevOps and Kubernetes, enabling faster release cycles.

Project: Banking Assessment & Modernization (ASP.NET MVC, Razor, SonarQube, SQL Optimization)

- Conducted technical assessment focusing on code quality and release readiness using SonarQube.
- Provided database performance recommendations and index optimization strategies.
- Introduced xUnit test strategies to enhance reliability and deployment confidence.

Project: Dynamic Procedures Platform (ASP.NET Core, GraphQL, SQL, xUnit)

- Developed backend features enabling dynamic procedural workflows.
- Enhanced data access layers with optimized LINQ and SQL logic.
- Expanded PDF-based output logic and strengthened unit test coverage.

Project: Management Solution (ASP.NET WebForms, SQL Server, Pentaho, Azure Data Factory)

- Enhanced legacy modules and resolved production issues for financial workflows.
- Built and maintained ETL pipelines using Pentaho and Azure Data Factory.
- Developed SSRS reports and optimized stored procedures for performance.

CareCloud — Software Engineer

Jun 2020 – May 2022 | ASP.NET Core, Angular, SQL Server

- Migrated healthcare application modules from ASP.NET 4.5 to Core 3.0, improving performance and maintainability.
- Developed APIs and backend logic using ASP.NET Web API and SQL Server, supporting billing and insurance workflows.
- Created and optimized complex stored procedures and queries to improve processing time and data accuracy.
- Deployed applications using IIS and TFS, ensuring stable releases and reduced deployment issues.
- Collaborated across teams to deliver enhancements under Agile sprints, maintaining a consistent delivery cadence.

Elikser — Software Engineer

Apr 2019 – May 2020 | ASP.NET Core, Angular, SQL Server

- Developed REST APIs using the Repository Pattern, improving reusability and scalability across student and parent modules.
- Built reusable Angular components, reducing UI duplication and improving delivery speed.
- Delivered features in an Agile workflow, reducing production defects and ensuring consistent release cycles.

Education

Bachelor of Science in Computer Science

Capital University of Science and Technology — Islamabad, Pakistan (2019)
